

Table X. Table with RowSpan following ColSpan in column headers

Education Level	Jobs		Median Annual Wage, 2010
	2010	2020	
Ph.D.	4,400	5,300	\$87,500
Master's degree	2,000	2,400	\$60,200
Bachelor's degree	22,000	26,000	\$63,400
Associate/Certificate	15,000	18,000	\$49,000
Diploma/GED or less	99,000	112,000	\$28,900

Above Table: 7 rows by 4 columns with 15 data cells.

Top row headers —

Row 1 Column 1 Education Level: RowSpan 2.

Row 1 Column 2 Jobs: ColSpan 2.

Row 1 Column 4 Median Annual Wage 2010: RowSpan 2.

Row 2 Column 2 Jobs 2010: no span.

Row 2 Column 3 Jobs 2020: no span.

Other row headers — no spans.

Problem:

RowSpan 2 in Row1 Column 4 displaces cell below it.

If navigating using up and down arrows only,

Row 3 column 4 is called column 5.

If navigating with CTRL + ALT + arrows,

Row 3 column 4 is inaccessible from above, left, or below (edge of table).

The rest of column 4 is unaffected.

Table Y. Table with ColSpan following RowSpan in row headers

Education Level		Jobs, 2010	Jobs, 2020	Median Annual Wage, 2010
Graduate	Ph.D.	4,410	5,286	\$87,500
	Master's degree	1,986	2,417	\$60,200
Bachelor's degree		22,171	25,827	\$63,400
Associate/Certificate		15,330	18,013	\$49,000
Diploma/GED or less		99,171	111,993	\$28,900

Above Table: 6 rows by 5 columns with 15 data cells.

Top row headers

Row 1 Column 1 Education Level: ColSpan 2.

Other column headers — no spans.

Row 2 Column 1 Graduate: RowSpan 2.

Row 2 Column 2 PhD: no span.

Row 3 Column 2 Master's Degree: no span.

Row 4 Column 1 Bachelor's Degree: ColSpan 2.

Row 5 Column 1: Associate/Certificate: ColSpan 2.

Row 6 Column 1 Diploma/GED: ColSpan 2.

Multiple issues to be detailed in ticket.
